

National Severe Weather Warning Service

Chief Forecasters Assessment

Heavy showers will affect many parts through today. Some of these showers will be thundery and quite prolonged, though not on a scale of that experienced earlier this week. Whilst most places will miss the very heaviest showers, locally 15 mm of rain may fall in an hour and very locally 30 mm rain could fall in two or three hours. Today's showers will then slowly start to fade away this evening. Lightning could be an additional hazard.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **13:00 on Sat, 22nd Jul 2017** until **22:00 on Sat, 22nd Jul 2017**

Heavy, thundery showers could lead to some localised flooding, especially where they affect urban areas.
